

Sprint 4 Plan

Goal: To add functionality by allowing users to flesh out their profile availability

User Story 1

As a user I would like to be able to manage my schedule and edit my workouts so that I can have control over how I'd like to schedule my workouts.

Task	Hours	Team
For each entry, an edit button next to the delete button in the "edit schedule" page, when pressed, will transition to the schedule and workout pages, respectively.	2	AH/LL Done
When editing an entry, preload the previously entered information into the schedule and workout pages that can then be edited and stored, updating the old information in Firebase.	8	AH/LL5 Done
A clear button in the "edit schedule" page in the top right corner (next to the back button) that will clear the schedule list and the database when pressed.	4	LL Done
Implement overlap constraint to prevent scheduling a day and a time that conflicts with another.	10	LL Done
On the home page and in the edit schedule page, sort the schedule by day and time (currently sorted by the most recently added item).	5	Webin Done
Once clicking "Next" on the add schedule page to transition to the add workout page, on the add workout page, add the "Back" button that transitions back to the schedule page, and preloads the previously entered information there.	4	Completed

User Story 2

As a user I would like to be able to view a description about a muscle group and a list of exercises pertaining to that specific muscle group.

Task	Hours	Team
From the Sidebar, have a “Muscle Information” button that transitions to an information page.	3	GC(DONE)
An information page with details about each muscle group and sample exercises attributed to them (most likely list).	8	GC(DONE)
Display color coded logos for muscles, and maybe a legend (like the add a workout page) alongside muscle definitions.	5	LL(DONE)

User Story 3

As a user I would like to be notified when a workout is coming up

Task	Hours	Team
Retrieve scheduled workout times from schedule	5	LL DONE
Compare time of phone clock and compare with user's scheduled time	7	AH (DONE)
Notify message when within 15 minutes	5	AH (DONE)
Pop up notification widget “workout is coming up in 15 minutes”	5	AH (DONE)
