

Sprint 2 Plan

Goal: To add functionality by allowing users to flesh out their profile availability

User Story 1

As a user I would like to create and save a schedule of my workout availability

Task	Hours	Team
Display an empty availability page with the option to edit	2	wb
Display an image to the empty page	3	wb
Make the image opaque/disappear when it is displaying information	8	wb
Display edit page with every day of the week and a button to add times and a button to finish editing	2	AH
Add a button to add times to the dates that only displays on the bottom time for that date	4-5	LL
Add a button to delete times that i've placed	2-3	AH
When the edit button is pressed to go the edit activity	2	LL
When button to finished is pressed save the availability information to firebase	8-10	GC&C L?
When delete is pressed remove the time	4-5	LL
Back button to go back to main page for availability	2	CL

User Story 2

As a user I would like to specify what workouts I do

Task	Hours	Team
Have an edit button that edits my workouts	2	GC
Categorize my workouts based on back, shoulder, chest, etc.	2	GC
An addition button that lets me add a workout	3	GC

A deletion button that lets me delete certain workouts	3	AH
A finish button that saves my workouts	8-10	CL
A back button that takes me back to my main profile	2	AH
