

Sprint 3 Report
Lyfter
Gainsville Team
11/19/2018

Actions to stop doing: As a team, we need to stop putting off work until the last half of the week.

Actions to start doing: As a team we need to meet up more often and work on tasks in the same room. That would definitely help with our productivity.

Actions to keep doing: Continue to hold regular SCRUM meetings about 3-4 times a week, including the meeting with the TA. These meetings helps us as a team keep track of each other's progress and helps out with getting feedback on the work we have accomplished.

Work completed/not completed:

- User Story 1 (Completed) - As a user I would like to create and save workouts to a database and tie that to my schedule database and have both be displayed at the same time for the current user.

- ☐ Save the user workout components to the firebase database and tie that with firebase authenticator for the current user.
- ☐ Display the schedule in order i.e. M before T, before W.
- ☐ Pull from the schedule database and the workout database simultaneously and tie them together by some key (email).
- ☐ Have the elements from the schedule database, and from the workout database be displayed together in a listView on the main page.
- ☐ Having the listViews refresh (when deleting an element) without having to change activities in order for them to do so.

- User Story 2 (Barely Completed): As a user i would like to have a profile page to track my progress

- ☐ Not completed:
 - ☐ We did not create a profile page with editable fields
 - ☐ We don't have a working edit button for the user profile
 - ☐ We did not tie the database to firebase authenticators like (name, height, weight, etc).
- ☐ Completed:
 - ☐ Got rid of the textbox when tapping away from the screen.
