Sprint 2 Report
Lyfter
Gainsville Team
11/4/2018

Actions to stop doing: As a team, we should stop avoiding asking for help until the last minute. There are usually group members that can afford to help out on a task if another group member is stuck.

Actions to start doing: As a team, we should start meeting up on a weekly basis as opposed to a biweekly basis in order to put together our project so we are not rushing to do it a day or two before.

Actions to keep doing: Continue to hold regular SCRUM meetings about 3-4 times a week, including the meeting with the TA. These meetings helps us as a team keep track of each other's progress and helps out with getting feedback on the work we have accomplished.

Work completed/not completed: Both user stories were partially complete during Sprint 2.
● User Story 1 (Partially Completed) - As a user I would like to create and save a schedule of my workout availability
○ Completed Tasks -
  ❏ Display an empty availability page with the option to edit
  ❏ Display an image to the empty page
  ❏ Display edit page with every day of the week and a button to add times and a button to finish editing
  ❏ Add a button to delete times that i've placed
  ❏ Back button to go back to main page for availability
○ Incomplete Tasks -
  ❏ Make the image opaque/disappear when it is displaying information
  ❏ Add a button to add times to the dates that only displays on the bottom time for that date
  ❏ When the edit button is pressed to go the edit activity
  ❏ When button to finished is pressed save the availability information to firebase
  ❏ When delete is pressed remove the time

● User Story 2(Partially Completed) - As a user I would like to specify what workouts I do
○ Completed Tasks
  ❏ Have an edit button that edits my workouts
  ❏ Categorize my workouts based on back, shoulder, chest, etc
  ❏ An addition button that lets me add a workout
  ❏ A deletion button that lets me delete certain workouts
  ❏ A back button that takes me back to my main profile
○ Incomplete Tasks -
  ❏ A finish button that saves my workouts

Work completion rate: Most of both user stories were completed this sprint. There was a plan for a total of 60 work hours over a span of 14 days, 10 of which were weekdays. We were able to complete 32 of the 52 ideal work hours. However, despite the 20 hour deficit in our progress, those hours were split among only 3 tasks.
