Sprint 1 Report
Lyfter
Gainsville Team
10/21/2018

Actions to stop doing

       As a team we should stop procrastinating tasks until towards the end of the sprint because then it would leave us with more time to finish up tasks that may unexpectedly take up more time than other tasks.

Actions to start doing

       As a team, people should start group work session if they are working on relatable tasks. As a team, we need to break some tasks down into smaller tasks and be more accurate at estimating work tasks since we were not able to get started on a user story this sprint.

Actions to keep doing

       Continue to hold regular SCRUM meetings about 3-4 times a week, including the meeting with the TA. These meetings helps us as a team keep track of each other's progress and hiccups that may arise.

Work completed/not completed

       Only user story 1 was completed during Sprint 1. User story 2 is partially finished, while user story 3 did not get started.

- User Story 1 (Completed) - As a user i would like to create and account
- User Story 2(Partially Completed) - As a user I would like to be able to customize my profile with specific details, workouts, and scheduling
    - Completed Tasks - Profile UI & personal details, fitness level and experience
    - Incomplete Tasks - Implement list style for adding/removing workouts, taking photo from gallery of a phone and using it as a profile picture, set up prefered schedule for workouts
- User Story 3(Didn't Start) - As a user I would like to see other user profiles, Filter other profiles through experience/workout types

Work completion rate

       Only one user story was completed in this sprint with one user story partially finished and another that have not been started yet. There was a plan for a total of 43 work hours over a span of 14 days, 10 of which were weekdays. We were able to complete 28 of the 43 ideal work hours.
