Sprint 4 Report
Lyfter
Gainsville Team
12/2/2018

Actions to stop doing: As a team, we need to begin work on the user stories earlier to ensure team members get the help they need on tasks that are unfinished.

Actions to start doing: As a team, we should have people who work on the same user story work together to improve productivity.

Actions to keep doing: As a team, we should continue to hold regular SCRUM meetings multiple times during the week, and communicate thoroughly with each other on Slack when issues arise in the case a member gets stuck on a task.

Work completed/not completed: We had three user stories for this sprint. We completed all the user stories.

- User Story 1(Completed) - As a user I would like to be able to manage my schedule and edit my workouts so that I can have control over how I'd like to schedule my workouts.
- User Story 2(Completed) - As a user I would like to be able to view a description about a muscle group and a list of exercises pertaining to that specific muscle group.
- User Story 3(Completed) - As a user I would like to be able to be notified when a workout is coming up

Work completion rate: All of our user stories got completed this sprint. There was a plan for a total of 73 work hours (its alot) over a span of 14 days, 8 of which were weekdays. We were able to complete all the work hours
